EOM240.03 Participate in a Space Survival Scenario

IMPORTANT

- You will be participating in a space survival scenario
 - Critical thinking
 - Priorities?
- Understand the challenges astronauts face while living in space
- This knowledge will be useful in future activities

Teaching Points

TP1 : Choose Five
Survival Items to
Survive in Space

TP2 : Have the
Cadets Explain Why
They Chose Their
Items for Survival

Before We Start...

Water On the Moon

- Water discovered on the moon in March 5, 1998
- Ice exists in the shadows on the moon - they are -140°C!
- Anywhere else, water would be vaporized by the sun

Astronaut Activities

- Everyday activities are challenging due to low gravity!
 - Everything floats unless tied down
 - Food can float up your nose
- Astronauts build/maintain the International Space Station
- They also perform experiments & studies to help development in the future

Let's Start!

1. Get into groups of 5-7
 2. Read the handout given
 3. Follow instructions on the handout.
- You have **15 minutes!**

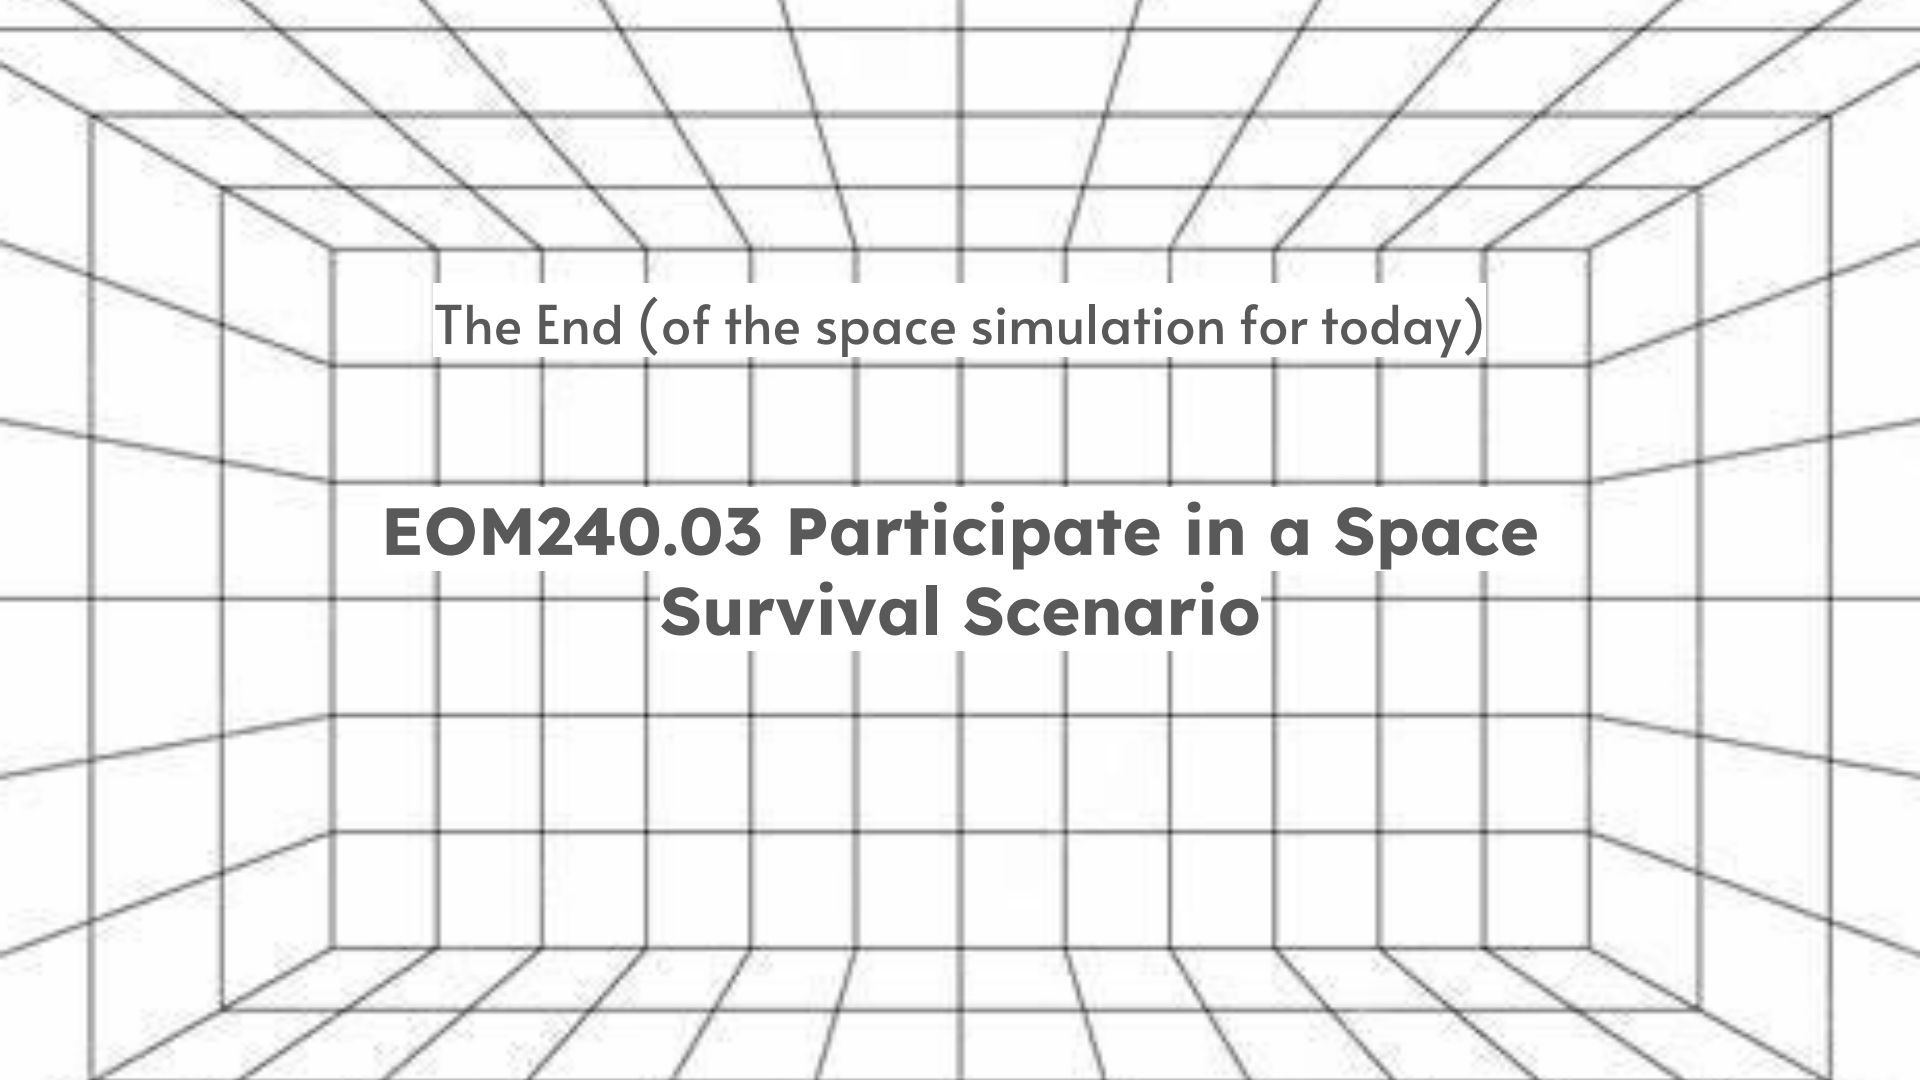

Time to Discuss

Things that you can share (You're not limited to these questions):

- What 5 things did you choose out of the 8 items? Why?
- How did you rank the items on the list? Why did you rank them that way?
- How do you plan to use your items to survive?

RECAP

- Space survival activity
- Thought about the life of an astronaut
- Fun fact(s) about the moon

The End (of the space simulation for today)

EOM240.03 Participate in a Space Survival Scenario
