

EOM231.04 –
DESCRIBE THE
AXIAL
MOVEMENTS
OF AN
AIRCRAFT

TP1 Identify the Three Axes of Aircraft Movement

- ▶ All movement of the aircraft takes place around the **centre of gravity**
- ▶ The **vertical axis** runs vertically through the centre of gravity.
- ▶ The **longitudinal axis** runs lengthwise
- ▶ The **lateral axis** runs from wingtip to wingtip

TP2 Describe the Three Axial Movements

TP3 Simultaneous Axial Movement of an Aircraft

Often, aircrafts need to perform 2 or more axial movements during flight maneuvers
